

GOLDVISION SOFTWARE

"CREATING THE TOTAL INFORMATION REPOSITORY"
Document - File - Image Management

Which Lot Are You In?

Problem: National research shows that as much as 50% of an employee's day is spent looking for a document or file, either in their office or on their computer. While orderly paper filing systems have been created over the years, most computer files are stored in a very disorganized fashion, without standardized naming conventions or built-in retrieval capabilities. Critical information created at considerable time and cost is stored with little or no association to its business relationship or subject matter. Practically speaking, only the employee that has created or edited the file holds the keys to retrieve that information.

Solution: GoldVisionPro Software rapidly creates valuable company wide benefits such as the ability to access ALL of an organization's contact related information for ALL employees. Quickly empower your staff for proper decisions with an intelligent naming system. Vastly increase productivity with quick and powerful retrieval capabilities for letters, spreadsheets, faxes, photos, recordings, scans, presentations or *anything* relating to your employee, sale or subject. Valet Parking for your files quickly organizes your entire file system and effortlessly becomes "A Total Information Repository."

GOLDVISION SOFTWARE FACTS

For the cost of one standard five-drawer filing cabinet, you can electronically store over **34 million scanned pages** or over **300 million pages** of word processing documents.

In the last four years alone, the consumer cost of hard drive storage has dropped from \$10.00 per Gigabyte to \$0.75 per Gigabyte.

You can store 284 scanned pages for **ONE CENT.**

You can store over 44,000 high quality color photos for the cost of a disposable camera.

You can scan a full page document in less than 5 seconds, on an inexpensive portable scanner, and in less than 1 second on a corporate strength scanner.

GoldVisionPro can Auto Name, Auto Index, Auto Store and Auto Link a file straight from your word processor into your Customer Relationship Management system in less time than it takes to sharpen your pencil.

GoldVisionPro can retrieve over 700 files specific to just one user in 5 seconds.

GoldVisionPro can sort through 5,500 files in 1 second.
